

## ***Salem Sixth Grade Delicious Tags:***

In order to make organizing and sharing websites easy between the 6<sup>th</sup> Grade LA/SS PLC, we've created a collection of shared Delicious tags that we all plan to use when we discover new sites. By using shared tags, we'll all be able to see one another's "website finds" automatically!

A few Delicious tips and pointers:

1. When bookmarking, be sure to change the default "Description" in your Delicious tagging window when needed. Sometimes, the default description is something confusing, crazy or ridiculously long. Remember that whatever is in this box is what we'll all see when looking at the site you've found. Will it be something we understand immediately?
2. When bookmarking, always write a short description of the site that you find in the "Notes" box of your Delicious tagging window. This will help others to understand the link that you've bookmarked without needing to hunt you down for details. Talk about a timesaver in the long run!
3. To see the most recent website finds collected by teachers of the 6<sup>th</sup> grade LA/SS PLC, visit one of the two following Pageflake web addresses:

**LA Pageflake Address:** From this address, you'll be able to track the 15 most recent additions to our LA resource collections.

<http://www.pageflakes.com/wferriter/22658396>

**SS Pageflake Address:** From this address, you'll be able to track the 15 most recent additions to our SS resource collections.

4. To see the complete collection of resources bookmarked by LA/SS PLC members, visit the "Delicious Feeds" folder posted in both the "Language Arts Plans" and "Social Studies Plans" folders of Blackboard. Following the links in those folders will take you directly to a list of all of the links bookmarked by teachers of the LA/SS team over time in each of our predetermined categories.

5. Remember to follow the tag structures listed below when tagging new websites in order to have your resources automatically added to our shared lists:
